May 1990

PREFACE

This Labor Market Information publication, CIVILIAN LABOR FORCE ESTIMATES FOR NORTH CAROLINA, is the twenty-eighth in a continuing series. The estimates in the publication supersede all previously published data, and they include revisions which incorporate more current information.

Monthly labor force estimates are included for the state, counties, metropolitan statistical areas (MSA), and multi-county labor areas for 1988. Annual average data are shown for the years 1978-1988. The county estimates may not add to MSA or state totals due to rounding.

The civilian labor force, total employment, and total unemployment are presented in the upper portion of each table. These data are based on PLACE OF RESIDENCE, while industry employment is by PLACE OF WORK.

Titles of the manufacturing and nonmanufacturing industry divisions have been shortened for space purposes. Detailed titles are shown in Appendix D. The industry designations are based on the 1987 Standard Industrial Classification (SIC) Manual. Before 1988 they were based on the 1972 Manual.

ESTIMATES FOR 1984 - 1988 WERE DEVELOPED BASED ON THE 1980 CENSUS OF POPULATION. THE DATA FOR THE FIVE MOST RECENT YEARS ARE, THEREFORE, NOT STRICTLY COMPARABLE TO PRIOR YEARS.

TABLE OF CONTENTS

	PAGE
Preface	1
Directory of County Labor Force Estimates	5
Directory of MSA Labor Force Estimates	6
Directory of Multi-County Labor Force Estimates	7
Directory of North Carolina Multi-County Planning Regions	8
Labor Force Summary of Counties	9
Civilian Labor Force Estimates for North Carolina	13-16
Civilian Labor Force Estimates by County	17-218
Civilian Labor Force Estimates by MSA	219-238
Civilian Labor Force Estimates by Multi-County Labor Areas	239-252
Civilian Labor Force Estimates by Multi-County Planning Regions	253-272
Appendix	273

EXPLANATORY NOTES

The labor force estimates shown in this publication were developed using procedures that were designed by the United States Department of Labor. The procedures are described in the Manual For Developing Local Area Unemployment Statistics.

The employment estimates in this publication were derived by segment and are summed for the total . Employment in the manufacturing and nonmanufacturing segments are derived by compiling data from all firms covered by the Employment Security Law of North Carolina, all railroad establishments, and non-profit establishments, and government establishments not covered by the Employment Security Law. Since these data are secured from establishments, they represent employment by place of work. Total employment has been adjusted to a place of residence concept. In gereral, the "place of residence" estimate for an area differs from the "place of work" estimate in that an adjustment has been made to remove the effects of commuting and multiple jobholding. Persons involved in labor management disputes some time during the year are counted in the employment totals.

The estimates of "all other" nonagricultural employment are derived by relating current national trends in employment in the segment to census data and to the relative change in nonfarm wage and salary employment in an area.

Unemployment estimates are derived following the detailed methodology included in the Manual For Developing Local Area Unemployment Statistics. The unemployment data are conceptually comparable with those released by the U. S. Department of Labor each month. The national data are based on a sample of almost 60,000 households throughout the country. Beginning in January 1985 North Carolina became a "direct use" Current Population Survey (CPS) state. Since that time the state data have been based on a sample of more than 2,800 households in North Carolina. (State data prior to 1985 are not comparable.) The county information starts with a count of persons filing for unemployment insurance benefits. To this total are added appropriate estimates for unemployed persons who have exhausted their unemployment insurance benefits and are still unemployed; persons who have delayed filing for benefits but who are not working; unemployed persons who applied for benefits but are not qualified to receive them; workers separated from industries not covered by unemployment insurance; and unemployed persons newly entering or reentering the labor force. The estimates thus include all persons who were not at work but were actively seeking work or had made specific efforts to find a job during the preceding four weeks. Unemployed persons are counted by their place of residence.

Appendix B

DEFINITIONS OF TERMS

Labor Area - - A geographic area consisting of a central community and surrounding territory in which there is a concentration of economic activity or labor demand and in which workers can generally change jobs without changing their residence. In North Carolina a labor area follows county boundary lines and may consist of one or more counties.

Civilian Labor Force - - The total number of employed and unemployed persons, excluding military personnel.

Employment - - All persons who worked for pay or profit, or worked without pay for 15 hours or more per week in a family farm or business.

Unemployment - - All persons who did not work at all but were able, available, and looking for work. Includes all jobless persons looking for work, regardless of whether or not they qualify for unemployment insurance benefits.

Rate of Unemployment - - The number of unemployed as a percent of the civilian labor force.

Nonagricultural Wage and Salary Employment - - All full-time and part-time nonfarm production and nonproduction employees who worked in or received compensation from nonfarm establishments.

All Other Employment - - Nonfarm self-employed workers, unpaid family workers, and domestic workers in private households, i.e., those nonfarm self-employed who worked for profit or fees in their own businesses, professions or trade; unpaid family workers who worked without pay in a business operated by a member of the household to whom they are related by blood or marriage; and domestic workers in private nonfarm households.

Agricultural Employment - - All operators, managers, unpaid family workers, and other hired workers on farm establishments, including domestic workers in farm households.

SIC Code - - Standard Industrial Classification in numerical code used to categorize industrial establishments by the main activity in which they are engaged. See Appendix D for a listing of the two-digit industrial codes used in this publication.

Appendix C

BASIC DATA USED IN DEVELOPING LABOR FORCE ESTIMATES

ESC Tabulations showing employment in firms covered by Employment Security Law

Census of Population

Farm Labor, United States Department of Agriculture

Special surveys of employment in noncovered industries, e.g., government, schools, hospitals, etc.

The U. S. Bureau of Labor Statistics for certain segments of employment

Unemployment Insurance claimant data from the Employment Security Commission and the Railroad Retirement Board

Various publications from local, state, and federal agencies showing related labor force data.

Bureau of the Budget, Standard Industrial Classification Manual, for determining industrial classification of firms

Appendix D

STANDARD INDUSTRIAL CLASSIFICATION FOR INDUSTRIES

Industry Code	Title of Industry	Shortened Title
20-39	**Manufacturing**	**Manufacturing**
20	Food and kindred products	Food
21	Tobacco manufactures	Tobacco
22	Textile mill products	Textiles
23	Apparel and other finished products made from fabrics	Apparel
24	Lumber and wood products, except furniture	Lumber & Wood
25	Furniture and fixtures	Furniture
26	Paper and allied products	Paper
27	Printing, publishing, and allied industries	Printing
28	Chemicals and allied products	Chemicals
29	Petroleum refining and related industries	Petroleum
30	Rubber and miscellaneous plastic products	Rubber
31	Leather and leather products	Leather
32	Stone, clay, glass, and concrete products	Stone, Clay, & Glass
33	Primary metal industries	Prim. Metals
34	Fabricated metal products	Fab. Metals
35	Machinery, except electrical	Nonelec. Machinery
36	Electrical machinery, equipment, and supplies	Elec. Machinery
37	Transportation equipment	Trans. Equipment
38	Professional, scientific, and controlling instruments	Instruments
39	Miscellaneous manufacturing industries	Misc. Mfg.
15-17	Contract construction	Construction
40-49	Transportation, communications, electric, gas, and sanitary services	Trans., Comm., & Pub. Util.
50-59	Wholesale and retail trade	Trade
60-67	Finance, insurance, and real estate	Fin., Ins., & Real Estate
70-89	Services (excluding domestics)	Service
	Service and miscellaneous (includes 07-14)	Service & Miscellaneous
91-94	Government	Government
07-14	Agricultural services, forestry, fisheries, and mining	Other Nonmanufacturing

Project Staff

The publication, ***Civilian Labor Force Estimates for North Carolina*** was prepared by S. Sydney Armstrong with the assistance of Yvonne G. Ennis, James R. Poole, Violet M. Sellers, and Roberta S. Cheney, who prepared the layout on a microcomputer. It was prepared under the direction of Thelbert E. Langley, Project Manager, Statistician in the Labor Market Information Division.

Nine hundred and fifty (950) copies of this public document were printed at a cost of $1,690.00 or $1.78 per copy.
